Skills

Web / Full stack
Typescript, Javascript, React, Storybook, Node.js, HTML, CSS

Architecture & Tooling
Monorepos, Design Systems, Microfrontends, Webpack Module Federation, Storybook, CI/CD, Git

Testing
Jest, React Testing Library, Playwright

Additional
Next.js, Astro, React Native, Expo, Python

Languages

English
FCE

Italian
CELI 3

German
Currently learning

Education

University of Athens
Department of Informatics

Summary

Senior software engineer with 10 years of experience building web applications and backend services, primarily with Typescript, React and Node. Experienced in leading product development from ideation to implementation, working closely with product, design and engineering teams. Strong focus on software architecture, developer experience and maintainable systems.

Experience

Workable — **Remote**
Senior II Frontend Engineer — **Jan 2024 – Present**
Senior I Frontend Engineer — **Oct 2022 – Jan 2024**

- Led UI development across our core applicant tracking system and candidate-facing applications, collaborating with product, design, and backend teams.
- Led frontend development of Workable AI agent and built key features for AI careers page copilot, including agentic job creation, candidate chat, and careers-site editing.
- Coordinated the migration of legacy ATS features to a shared microfrontend architecture using Webpack Module Federation, improving modularity, CI workflows, and developer experience. This also paved the way for wide adoption of this pattern across our UI monorepo.
- Drove frontend tooling and testing modernization across our UI monorepo, including major ESLint, Jest, and Rspack upgrades, and migrations from Enzyme to React Testing Library.
- Contributed to our shared design system, developing reusable components and improving UI consistency and developer workflows across teams.

DTWISE — **Athens, GR**
Software Engineer — **Apr 2018 – Oct 2022**

- Designed and built a Unix-like query language on top of Elasticsearch, which became the foundation for an analytics and dashboard-building platform used by our engineers to explore energy data.
- Developed fullstack applications, Node.js APIs, reusable libraries, and data visualizations for an energy monitoring platform.
- Built a React Native mobile application and administration platform for an EV charging solution, integrating with different charging stations.
- Mentored two junior engineers in JavaScript and React, supporting their technical development.

Agile Actors — **Athens, GR**
Web Developer — **Jan 2017 – Apr 2018**

- Developed features for a data analytics platform using React and AngularJS as part of a small engineering team.
- Optimized a Node.js data-processing tool, improving its performance and reliability.
